Submission Number: 125		Proposer: New Flyer of America Inc.
RFP Number: RFP #18-03	Page: 51	Section: , Auxiliary Power Connections
Questions/Clarification or Approved Equal: New Flyer requests approval to provide a jumpstart connector with 2/0 cables. These cables provide the following benefits: - The jumpstart is located on the fuse box which provides for a short jumpstart cable length. The size of cable provided results in minimal voltage drop along this short cable length. - This 2/0 cable is sized correctly to handle the current that would be experienced on this circuit. - This cable size is very flexible allowing for a clean cable routing in the fusebox.
